PRESS RELEASE

Date: 11.06.2021

From the Desk of PARAG PATIL, MD

It gives me immense pride and pleasure to inform you that our **DURASHELL brand composite pressure vessels** are now **NSF 61** certified & officially listed on NSF website . Shalin Composites India Pvt Ltd is now the only 2nd company in whole India to obtain such certification for composite pressure vessels.

The certification is accorded by **NSF International, USA** which is world's leading and recognized laboratory for testing and certifying water treatment equipment as safe for potable water application. The tests include subjecting our LDPE liners of vessel to long exposure to various harsh chemicals, its effects on liners and for any leaching of liner material in chemicals after prolonged exposure.

After such rigorous testing of over 2 months we are now finally accredited to use coveted NSF stamp for all our LDPE liner DURASHELL vessel.

This certification has only made us more conscious of our commitment, to our customers & business associates, to offer most reliable and long serving Composite Pressure Vessels in water treatment industry. Hence, we will now newly dedicate & firmly commit ourselves to offer our quality products & services in most economical means.

At this juncture, I sincerely thank our customers for the trust shown in **MADE IN INDIA** vessels, who have contributed & made our success possible.

Best regards,

For, Shalin Composites India Pvt Ltd

Parag Patil
